Land Web Portal

CityShare® is a complete platform of easy to use suites and applications designed specifically for Local Government's unique budgeting, operating and financial requirements. Our intuitive enterprise level software is modular and fully integrated allowing users to start with a basic system while affording the flexibility to add scalable functionality and features as needs expand and grow more complex. **CityShare®** is developed using industry standard client server and web enabled architecture combined with enhanced collaboration tool sets that will satisfy your needs now and in the future. We know you need to do more with less – fewer resources - fewer keystrokes –faster results. This is why our products are designed to be the Smart Choice for Enterprise Software!

The CityShare® Land Web Portal ("the "Land Portal") is a native web product designed to extend critical business activity to the internet using a web browser on a tablet or PC for input and review. The Land Portal extends your municipal database to the internet with the important security features required to ensure the integrity of your information. No special web services are needed at your site as the software operates from our secure web servers providing a seamless interface for your organization. The Portal can be accessed by a PC or Laptop anywhere, anytime with an Internet connection.

Using a standard tablet device and the Land Web Portal, Codes personnel can record inspections, complete Inspection Checklists, create results letters, and print them out in the field! Violation tickets can be created and printed directly from the tablet. Land use survey information can also be captured "on the go". Access is also provided to all parcel information, including owners, tenants and property managers making it an excellent tool for police and fire officials who often need access to this type of information in off hours when office staff are not available to provide it.

The Land Web Portal will save you time and money in the pursuit of a safe, clean and attractive community.

Suites in the CityShare® Enterprise Solution

Financial Management is a complete and fully integrated multi fund accounting system for local government entities.

Employee Management provides all required functions of a complex Public Sector Payroll & Human Resources with integrated G/L & optional position control.

Revenue Management is a municipal billing and collection solution designed for local government utility operations that expedites bill processing, cash collection and control.

Land Management is a single tool for land use control and planning designed to manage all application, permit and violation documents featuring a centralized parcel database.

Tax Management is a comprehensive, modular billing solution for municipal governments that provides collection and reporting tools to automate your tax billing requirements.

Government Management provides the ability to distribute key features of accounting control with departmental security through the organization in a controlled manner.
